

A Safer Choice Has Just Arrived

THE COLLINS CHILD CARE BUS

What is the safety of your kids worth? With the reinforced, galvanized steel body, for school bus-like protection in both head-on and side collisions, the Collins Child Care Bus gives you peace of mind knowing you're giving your kids the safest ride possible.

Meets all FMVSS standards

The Low Profile of a Van - The Safety of a School Bus

With legislative changes for safety pending, child care administrators have two choices. Either wait for the federal government to force the retirement of non-conforming vans, or begin converting fleets right now.

EVERYONE WINS WITH SAFETY.

It should never take a tragedy. But, all too often, calling national attention to important safety issues takes just that. In 1994, six-year-old Jacob Strebler was killed when a truck driver ran a red light and crashed into a non-conforming van operated by a Private School in Columbia, South Carolina.

The National Traffic Motor Vehicle Safety Act, passed in 1974, specifically prohibits the sale of large passenger vans to schools for use in transporting children. In most cases, these vans were originally designed to haul large cargo, not people. So they don't have to pass the same government safety tests that passenger vehicles do.

The media attention generated by the Strebler case, which included a special feature on NBC's Dateline, has resonated in the political arena as well. Senator John McCain - chairman of the Senate Commerce Committee - has publicly mounted a campaign to help retire non-conforming vans.

SCHOOL BUS SAFETY AND FEATURES. VAN MANEUVERABILITY AND CONVENIENCE.

Collins builds the Collins Child Care Bus from the chassis up, engineering safety into every square millimeter. Available in single rear-wheel 9,600 lb. GVW, it features a reinforced, galvanized steel body, for bus-like protection in both head-on and side collisions. It also offers a smoother, sturdier ride, for added comfort and safety, with special child restraint seats to protect your precious passengers.

Steel construction safety cage for added strength and peace of mind

THE PRICE OF SAFETY.

Perhaps the biggest surprise to money-conscious child care administrators is how little price difference there is between an unsafe van and the ultra-safe Collins Child Care Bus. The Collins Child Care Bus costs about 10% more than a van, but the advantages far outweigh the expense. You see, the Collins Child Care Bus life expectancy is substantially longer than a van, giving you additional service life and the peace of mind knowing you're giving your kids the safest ride possible - all while protecting your administration from potential liability in the event of an accident involving a non-conforming van.

In addition, you can get the protection of a Collins' 5-year body warranty and a lifetime paint warranty to your investment.

OPTIONS FOR EVERY REQUIREMENT.

Everything you could imagine in the largest and best school buses, and many things you can only get in a plush conversion van.

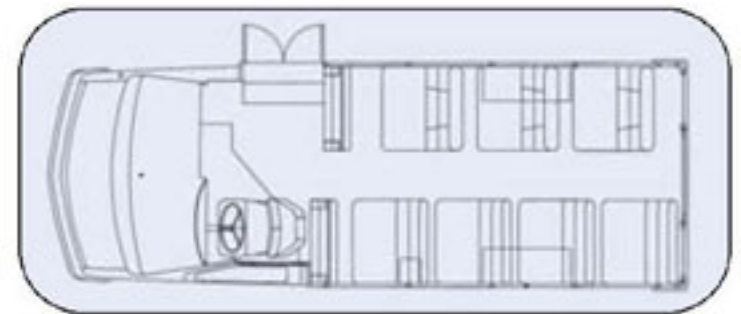

There are a number of options available

DRIVER FRIENDLY.

For all of its enhanced safety and comfort, the Collins Child Care Bus is still a Type A-II school bus. And under most state laws, anyone with a regular driver's license can operate them. You get all the safety of a small school bus, while avoiding the added expense of hiring additional commercial drivers.

FLEXIBLE FLOOR PLAN.

This floor plan illus-

trates the flexibility of combination seating. By using child restraint seats on the curb side, the Collins Child Care Bus can accommodate eight passengers and three child restraint seats or 14 total passengers.

DURA-DOOR™

One of the biggest complaints from bus drivers is the continued operation of the double-out door. That's why the engineers at Collins Bus have designed a power door system that solves this problem. This proprietary air cushioned door enables a driver to simply push a button to operate

the doors. It features maintenance-free design with no electric motors or gears, easy push-button technology, emergency manual back-up system and substantially reduces driver fatigue.

WHY COLLINS?

Collins Bus Corporation has been the leading small school bus provider in the industry for 30 years. In fact, we invented the first small bus under 10,000 lb. GVW. Best of all, it meets all National Transportation Safety Board highway safety requirements. We believe choosing Collins Bus is one of the safest and best decisions you could ever make.
